January 2024

Dear Valued Partner,

In June 2023, we discontinued a subset of ACUVUE® OASYS with Transitions™ parameters to support our commitment to advancing innovation and improving availability of supply amongst more common ACUVUE® brands. To further this strategy, today we are writing to inform you of our decision to discontinue the remaining parameters of ACUVUE® OASYS with Transitions™. **Effective March 8th, 2024, diagnostic lenses will be discontinued.** ACUVUE® OASYS with Transitions™ will remain available for purchase while supplies last until June 30th, 2024, when the product will be fully discontinued.

We will continue to manufacture, sell, and distribute all other ACUVUE® Brands:

- ACUVUE® OASYS 2-Week (also available in Astigmatism & Multifocal)
- ACUVUE® VITA® (also available in Astigmatism)
- ACUVUE® 2
- 1-DAY ACUVUE® DEFINE®
- ACUVUE® OASYS MAX 1-Day (also available in Multifocal)
- ACUVUE® OASYS 1-Day (also available in Astigmatism)
- 1-DAY ACUVUE® MOIST (also available in Astigmatism & Multifocal)

Our top priority remains ensuring our products are available for the patients and customers who rely on us. We will continue to focus on bringing new innovations and category growth to market while in parallel making decisions to balance our existing portfolio to prioritize the greatest patient needs.

New or existing patients currently wearing ACUVUE® OASYS with Transitions™ and looking for premium daily disposable options, could be recommended **ACUVUE® OASYS 1-Day** for exceptional performance, including comfort powered by tears^{*1}, or **ACUVUE® OASYS MAX 1-Day** with its ~60% blue-violet light filtering⁺² and reduced tear film evaporation^{^2,3}. For patients who wish to stay in reusable lenses, they could be recommended **ACUVUE® OASYS 2-Week**. In 29 clinical studies posted on ClinicalTrials.gov, the ACUVUE® OASYS Brand family has never been beaten in comfort[‡].

You can return any ACUVUE® OASYS with Transitions™ product on hand up to 6 months after the discontinuation date.

Should you have questions regarding this notice, please email us at jjvc-us-cs@its.jnj.com or speak with your strategic account manager.

On behalf of the Vision team at Johnson & Johnson MedTech, **thank you** for your continued support of the ACUVUE® Brand.

Carla Calizaire

* Designed to support the functions of the tear film

+ Filtering of HEV light by contact lenses has not been demonstrated to confer any health benefit to the user, including but not limited to retinal protection, protection from cataract progression, reduced eye strain, improved contrast, improved acuity, reduced glare, improved low light vision, or improved circadian rhythm/sleep cycle. The Eye Care Professional should be consulted for more information.

^ Versus ACUVUE® OASYS 1-Day

‡ ClinicalTrials.gov is a website maintained by the NIH. The 29 clinical studies evaluated subjective comfort as a primary or secondary endpoint for ACUVUE® OASYS Brand 2-week family, ACUVUE® OASYS 1-Day Brand family, and ACUVUE® OASYS MAX 1-Day Brand family of contact lenses, vs. competitors' products. Review conducted as of October 31, 2023.

Material Properties: 1-DAY ACUVUE® MOIST, 1-DAY ACUVUE® TruEye®, ACUVUE® OASYS 1-Day with HydraLuxe® Technology and ACUVUE® OASYS MAX 1-Day with TearStable™ Technology Brand Contact Lenses and other daily disposable contact lens brands.

Important Safety Information ACUVUE® Brand Contact Lenses are indicated for vision correction. As with any contact lens, eye problems, including corneal ulcers, can develop. Some wearers may experience mild irritation, itching or discomfort. Lenses should not be prescribed if patients have any eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. Consult the package insert for complete information. Complete information is also available from Johnson & Johnson Vision Care, Inc. by calling 1-800-843-2020, or by visiting www.jnjvisionpro.com.
