Date	

15.5			
Dx #	BC	Pwr	Sag
1	8.50	Plano	3.800
2	8.10	-1.00	4.100
3	7.80	-2.00	4.400
4	7.50	-3.00	4.700
5	7.20	-4.00	5.000
6	6.95	-5.00	5.300

16.5			
Dx #	BC	Pwr	Sag
7	8.70	Plano	4.100
8	8.30	-1.00	4.400
9	8.00	-2.00	4.700
10	7.65	-3.00	5.000
11	7.40	-4.00	5.300
12	7.10	-5.00	5.600

17.5			
Dx #	BC	Pwr	Sag
13	9.00	Plano	4.400
14	8.55	-1.00	4.700
15	8.15	-2.00	5.000
16	7.80	-3.00	5.300
17	7.50	-4.00	5.600
18	7.25	-5.00	5.900

1 and 2 are for original orders only

Fitting Procedure		OD			OS		
1	Select diameter based on HVID	11.4 <= 15.5	11.5 to 12.3 16.5	>= 12.4 17.5	11.4 <= 15.5	11.5 to 12.3 16.5	>= 12.4 17.5
2	Select Dx Reference Lens # Choose lens that has the best central clearance.	1-6	7-12	13-18	1-6	7-12	13-18

Original order - specify deltas required compared to the Dx reference lens

Adjustment orders - specify additional deltas required compared to the previous Rx lens

3	Modify Base Curve (optional) Specify change in 1) mid-peripheral clearance (microns), or 2) Diopters Note: BC changes will NOT affect lens sag or central clearance.								
4	Central Clearance Delta (+) for more central clearance, (-) for less, in microns								
5	Steep Sag Delta (+) for more SAG @ landing in steep meridian (-) for less, in microns								
6	Limbal Clearance Deltas – Flat & Steep (+) for more limbal clearance (-) for less, in microns	Flat/Shallow	Steep/Deep		Flat/Shallow	Steep/Deep			
7	Haptic Sag Lift Deltas – Flat & Steep (+) for more Haptic Sag (deeper, tighter), (-) for less Haptic Sag (shallower, looser), in microns	Flat	Steep		Flat	Steep			
(or)	Haptic Sag Deltas - Quad Haptic	Q1-0	Q2-90	Q3-180	Q4-270	Q1-0	Q2-90	Q3-180	Q4-270
8	Flat Meridian Axis Note position of Hash Marks, see example above	ccw(+) cw(-)				ccw(+) cw(-)			
9	Over-Refracton								
10	Edge Vault 1	dec	axis	diam	height	dec	axis	diam	height
	Edge Vault 2								
11	Material / Color	<input type="radio"/> Optimum Extra <input type="radio"/> Acuity 100 <input type="radio"/> Optimum Extreme <input type="radio"/> Acuity 200 <input type="radio"/> Optimum Infinite <input type="radio"/> Boston XO <input type="radio"/> Hexa 100				OD <input type="radio"/> Clear <input type="radio"/> Ice Blue		OS <input type="radio"/> Clear <input type="radio"/> Ice Blue	
12	Tangible® Hydra-PEG®	<input type="radio"/> Hydra-PEG®				<input type="radio"/> Hydra-PEG®
